

PERFMAN

KNOWLEDGE. VISIBILITY. POWER.

Hundreds of Proven Installations, Including:

About Us:

For over 20 years, PERFMAN has been dedicated to helping our customers paint a transparent picture of their total infrastructure, analyze their environments and plan for the future.

PERFMAN was founded by innovative technology entrepreneurs with the intention of providing insight and foresight to the entire enterprise, with easy-to-use reporting and modeling tools. The legacy continues today as we continue to expand and improve upon our software solutions by aligning with our customers' requirements and emerging technologies.

We are successful, with the fastest time to deployment in the industry and 100% implementation success across hundreds of customers; we are visionaries, always staying one step ahead of technology; we are dedicated, ask any of our customers; and we are proven, with our highly-scalable, comprehensive cross-platform software solution.

Founded in 1987, PERFMAN is a privately-held company headquartered in Bethlehem, PA with offices around the world.

THE PERFMAN SOLUTION

- Cross-Platform Enterprise Wide IT Systems Visibility
- Virtualization Planning & Management

KNOWLEDGE:

Decision makers need information to be accurate, timely and meaningful. You rely on PERFORMAN for the analysis that drives your decision making process.

VISIBILITY:

You need complete transparency – from the top down. You depend on PERFORMAN to paint a clear and accurate picture of your total enterprise wide IT environment.

POWER:

Be in control. Mitigate risk. Deliver increased value to your organization. You are confident in the decisions you make, when they are backed by information, models, projections and recommendations from PERFORMAN.

THE PERFORMAN SOLUTION

PERFORMAN delivers an end-to-end systems management solution that enables cross-platform modeling, management and optimization of physical and virtual environments for total visibility.

ANALYST

A Powerful Analytical and Modeling Tool

Analyst provides deep drill down analysis and accurate forecasting through an intuitive, fast and flexible interface. Analyst helps you:

- Model infrastructure changes with advanced simulation tools
- View your entire infrastructure and identify problems before they impact your users
- Perform detailed trend analysis to accurately anticipate the needs of your organization
- Identify consolidation opportunities through the virtualization candidate selection tool
- Manage the entire physical and virtual infrastructure from deployment through retirement

POINTVIEW™

An Executive Dashboard

PointView provides cross-platform visibility to the entire enterprise IT infrastructure through a single, easy-to-use interface. PointView helps you:

- Gain insight into your entire infrastructure via the web-based dashboard
- Produce sophisticated role-based reports and view resources by service, line of business, location, application, and more
- Quickly identify current and future problem areas
- Capture a snapshot of hundreds or thousands of multi-platform systems
- Compare and analyze key indicators across platforms to monitor performance

It's All About Having the **Right Information** and Making the **Right Decisions** at the **Right Time**, Enabling IT Governance and **Aligning IT** with **Business Objectives**

THE PERFORMAN SOLUTION PROVIDES:

- Cross-Platform Visibility
- Full Physical and Virtual Infrastructure Management
- Performance & Capacity Management
- Advanced Infrastructure Analytics

TO ENABLE:

- Data Center Optimization
- Physical and Virtual Server Consolidation
- Cost Control & Reduction
- Green IT Initiatives
- SLA Monitoring and Management
- Proactive Identification and Resolution of Infrastructure Bottlenecks

The PERFORMAN Solution provides visibility across the following operating environments and applications:

Operating Systems

- VMware ESX
- Microsoft Windows
- Red Hat Enterprise Linux
- SUSE Linux Enterprise Server
- AIX
- HP-UX
- Solaris
- IBM z/OS

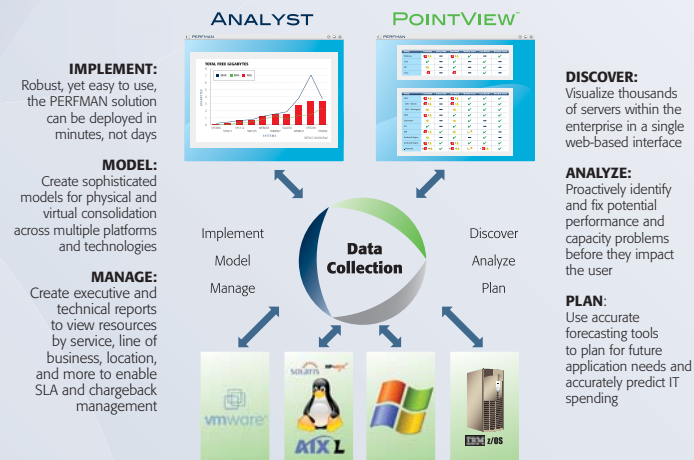

Application Environments

- Microsoft Exchange
- Microsoft IIS
- Microsoft SQL Server
- Active Directory
- Oracle
- IBM DB2
- CICS
- zLIPS & zAAPS
- Tape Libraries

“PERFORMAN HAS PROVIDED US SUBSTANTIAL INSIGHT INTO OUR IT ENVIRONMENT. THEIR SOFTWARE SAVES TIME, IS EASY TO USE AND SIMPLIFIES EVEN THE MOST COMPLEX PERFORMANCE AND CAPACITY DATA.”
